South Africa

Due to a high burden of HIV, TB, malnutrition, infectious disease, trauma and a significant portion of the population living in marked poverty - there is a great deal of PEM pathology in S Africa. We are able to custom-make PEM Fellowships to help the Fellow gain the ideal learning from their placement. Previous Fellows – have undertaken placements in Red Cross War Memorial Children’s Hospital Medical Emergency and/or Trauma Unit, New Somerset PEM unit and Khayelitsha District Hospital Paediatric Emergency Unit (a very busy township hospital). Ideal placements are for 12 months – but a minimum of 6 months is required. Qualified PEM/EM/Paediatric specialists or senior trainees may apply in writing to Dr. Cheema. Accreditation: experience only

Language: English

Registration Req: need to register with Health Professionals Council of South Africa (http://www.hpcsia.co.za/)

Official Training Prog: yes

Appendix 1  Additional Information

UK
Subspecialty training in Paediatric Emergency Medicine is available both for paediatric and adult emergency medicine trainees.
https://www.apem.me.uk
http://www.rcem.ac.uk/Training-Exams/Paediatric%20Emergency%20Medicine

Overseas Doctors:
Both paediatric and emergency medicine trainees can apply for paediatric emergency medicine fellowships for a maximum of 24 months duration in the UK via the Medical Training Initiative via either the Royal College of Emergency Medicine or the Royal College of Paediatrics & Child Health (MTI). This does not require sitting the PLAB exam. The application for a MTI fellowship can be made either by the hospital or by the doctor themselves through the relevant college (www.rcpch.ac.uk/mtip) or (www.collemergencymed.ac.uk/Training-Exams/Medical Training Initiative). This scheme would give formal accreditation to the trainee (eg for use in the European Union as specialist accreditation). Less formal training (experience plus certificate of attendance) is possible via the hospital directly. The same experience would be given to the doctor, and this route may be faster and simpler to organise.

Training in the UK for EU/EAA/Swiss Doctors:
Paediatric Emergency Medicine Fellowship programs can be offered by any approved centre as “LAT” posts. We would recommend that any EU/EAA/Swiss trainee undertaking a fellowship in the UK registers with the relevant college prior to starting their fellowship as this will allow them to take part in the ARCP process similar to UK and MTI fellowship trainees.
This then would facilitate the documentation of achievement of all their subspecialty training competencies through successful completion of the ARCP process, with the possibility of getting GMC recognition through the CESR route or through their home country/professional body.

Centres
An up to date list of all training centres is available via the college website (http://secure.collemergencymed.ac.uk/Training-Exams/Paediatric%20Emergency%20Medicine/PEM%20Training/PEM%20Training%20Centres). For further information contact the head of department at each institution directly.

Paediatric  trainees:
Total of 24 month
12 month Paediatric Emergency Medicine,
6 month Paediatric Intensive Care,
6 month specialty block (3 month Orthopaedics, 3 month Paediatric Surgery)

Emergency medicine trainees:
